Images of Iceland

Online Lecture

8:00pm start

Visitors welcome

Colin Westgate FRPS
MPAGB APAGB MFIAP

Iceland is geologically a very young island, formed less than 20 million years

ago by volcanic action as the earth's tectonic plates moved apart. The result is an amazing landscape of spectacular features: lava fields, waterfalls, ice caps and glaciers, hot springs, geysers, active volcanoes, black beaches, and the 'Northern Lights'.

This talk takes place online using the Zoom app. The login code will be emailed to members. Visitors are welcome and entry is free (voluntary donations are welcome). Please request the Zoom code by visiting www.hdcc.org.uk/syllabus
